

Multi-Pleat™ GT

MERV-8 Pleated Panel Air Filters for Gas Turbine Applications

The Koch Multi-Pleat™ GT pleated air filter offers upgraded prefilter performance in most gas turbine applications.

Multi-Pleat GT filters are specifically designed for use as a prefilter in gas turbine applications to help extend the life of more expensive final filters. Durable and efficient, the Multi-Pleat GT is an ideal choice for most gas turbine applications.

Low Pressure Drop/High Efficiency.

The Multi-Pleat GT carries a MERV-8 fractional efficiency rating in accordance with ASHRAE Test Standard 52.2 and has an initial pressure drop of less than .25" water gage. This combination of efficiency and low resistance to airflow make it a great upgrade to conventional pleated filters and media pads.

Durable Construction.

The Multi-Pleat GT is constructed of a double-wall wet-strength beverage-board frame with reinforced corners. The MERV-8 synthetic media is laminated to heavy-duty rust-resistant galvanized wire to form a rigid media pack. The media pack is bonded to all sides of the frame ensuring consistent pleat configuration and total media utilization. This bonds helps promote durability during its service life and helps to eliminate the possibility of air bypass. Two rows of pleat stabilizing fingers on the upstream side help maintain pleat spacing in difficult conditions.

- Upgraded Performance and Efficiency
- MERV-8 Efficiency Rating
- Upstream Support Fingers for Improved Stability
- Wet-Strength Beverage-Board Frame Construction
- Heavy Expanded Wire Support Grid

Multi-Pleat GT Technical Data

Actual Size	Initial Resistance @ 500/625 FPM (in. w.g.)	Recommended Final Resistance (in. w.g.)	Media Area (Sq. Ft.)	MERV Rating
23 ³ / ₈ x23 ³ / ₈ x3 ³ / ₄ "	.24/.30	1.5	28.0	8
11 ³ / ₈ x23 ³ / ₈ x3 ³ / ₄	.24/.30	1.5	14.0	8
23 ³ / ₈ x23 ³ / ₈ x1 ³ / ₄	.24/.32	1.5	18.4	8
11 ³ / ₈ x23 ³ / ₈ x1 ³ / ₄	.24/.32	1.5	9.2	8
