

# Oil Mist Cartridges

## FEATURES

Long filter lifecycle

Low replacement and maintenance cost

Eliminated downstream dust and fiber shedding

Low resistance to airflow increases energy savings

Eliminates corrosion and rust

Designed for high moisture and humidity

## Oil Mist Cartridges

Koch Filter has earned air filtration industry recognition as a world leader aftermarket supplier of dust collection air filters. Our filters have been successfully installed in thousands of dust collectors.

You'll find our filters in all environments, even the harshest and challenging. Innovative product introductions, ISO 9001 manufacturing facilities, application-specific solutions and extensive field and laboratory filter testing gives Koch an unique advantage over other suppliers.

Designed to fit Donaldson/Torit Dryflo® series with blended wet laid or all synthetic media available to meet your requirements.

### Media Options

ICF 12	<b>High Efficiency Cellulose/Synthetic Premium Media</b> Blended cellulose/synthetic premium media with a non-phenolic resin system. High hydrophobicity (moisture resistance), excellent capacity and cake release characteristics.
ICF 13S	<b>High Efficiency Premium Blend of Synthetic Media</b> Blended polyester/glass premium media with a vinyl chloride resin system. One of the highest moisture resistance media on the market, great cake release and media strength.
ICF 11SB-HO	<b>High Strength Spunbond Polyester</b> 100% synthetic spunbonded media with hydro-oleophobic proprietary coating. Resists hydrocarbons, moisture and water. Provides enhanced dust release.
